

INTRODUCING THE PERFORMANCE RANGE

Performance Tights that you'll never want to train without again. Comprising of 3 specialty tights, all with unique characteristics, our range is designed to amplify your Running and Training Experience.

BIONIX - CARBON FIBRE

Designed to deliver power and endurance on longer runs and during competition. The Carbon Fibre fabric prevents electrical charges settling on the body, thus improving bioelectrical activity, allowing the muscles to use energy more efficiently. This reaction increases muscle metabolism by 4%, reduces lactic acid build up by 12% and improves oxygen distribution, allowing you to run harder for longer.

KEY FEATURES

CARBON FIBRE FABRIC Hi-tech fabric designed to increase performance

MUSCULAR REINFORCEMENT Compression technology allows explosive mobility while providing support to key muscle groups

CONTOURED SEAMS Flat-lock comfort seams reduce rubbing and chafing

SPEED WAIST Low profile elastic waistband for secure comfortable fit while hitting top speed

EXTRA PROTECTION Double gusset to keep you super dry

STEALTH POCKET Internal pocket for storing essentials

BIONIX CARBON TECHNOLOGY

Bioelectricity is responsible for all movement in the human body. It's these electrical signals that command the muscles cells to perform muscular contraction and distension.

It's also important to know that electric charges settling on the body can lead to overheating, involuntary muscular contraction, cramps and fatigue during sports activity.

Testing on garments made with Carbon have shown that they are not only comfortable, but they also prevent electric charges from settling on the body, thus avoiding the negative reaction on muscular contractility.

Without obstructions caused by involuntary micro-contractions, the blood is able to reach even the peripheral areas, which results in improved muscular performance.

RESULTS:

- Increased muscle Metabolism
- Improved performance over time
- Lowers concentrations of lactic acid build up
- Enhanced blood circulation and cell oxidation
- Supercharged muscle warming – hit optimal performance faster
- Reduction in cramping and fatigue

FLOW RUNNERS - LIQUID TITANIUM

Perfect for everyday running and recovery. The liquid titanium fabric reacts with your body to produce infrared rays. These rays penetrate the muscles, resulting in improved blood flow, muscle metabolism and detoxification, while reducing muscle spasms and joint stiffness. Developed as an all-climate garment they provide superior body temp regulation, keeping you warm in winter and cool in summer.

KEY FEATURES

LIQUID TITANIUM FABRIC Hi-tech fabric designed to increase performance and protect your muscles

MUSCULAR REINFORCEMENT Compression technology allows explosive mobility while providing support to key muscle groups

CONTOURED SEAMS Flat-lock comfort seams reduce rubbing and chafing

SPEED WAIST Low profile elastic waistband for secure comfortable fit while hitting top speed

EXTRA PROTECTION Double gusset to keep you super dry

STEALTH POCKET Internal pocket for storing essentials

FLOW RUNNERS TITANIUM TECHNOLOGY

Liquid Titanium fabric reacts with your body heat to produce Far Infrared Rays.

Far Infrared Rays are invisible waves of energy that have the ability to penetrate all layers of the human physical body, including the inner-most regions of the tissues, muscles and bone.

These therapeutic rays increase blood flow by expanding the capillaries that carry blood. They also increase oxygenation and regeneration of the blood, deeply detoxifying it for the improved functioning of working muscles, which depend on blood for energy.

RESULTS:

- Increased muscle metabolism
- Lowers concentrations of lactic acid build up
- Enhanced blood circulation and cell oxidation
- Supercharged muscle warming – hit optimal performance faster
- Reduction in cramping and fatigue
- Muscle pain relief
- Boosts the immune system
- Reduced inflammation
- Detoxification – achieved as radiant heat helps to flush out toxic substances
- Eases nervous tension & stress

AIRIDERS - VAPOUR TECHNOLOGY

Our all-round tights designed for the everyday athlete. Made from the world's best moisture-management yarn, the Airiders transfer moisture from your skin 40% faster than regular tights. Compression technology combined with comfort means these tights are perfect for running, yoga and sweating it out at the gym.

KEY FEATURES

MOISTURE MANAGEMENT FABRIC Hi-tech fabric designed to vapourise moisture

MUSCULAR REINFORCEMENT Compression technology allows explosive mobility while providing support to key muscle groups

CONTOURED SEAMS Flat-lock comfort seams reduce rubbing and chafing

STABILITY WAIST High Profile waist for secure comfortable fit while working out

EXTRA PROTECTION Double gusset to keep you super dry

STORESAFE POCKET 10cm zip pocket in the waist for storing essentials

AIR MESH Calves can breathe while looking fabulous

AIRIDERS VAPOUR TECHNOLOGY

Using an advanced Catch, Move and Release System, the Airiders fabric moves moisture faster and further.

The first step in removing moisture is to catch it. Using the same principle as magnetism, the fabric instantly reaches out, grabs, and pulls in the moisture. Other yarns absorb moisture after

prolonged contact, but the Airiders absorb moisture immediately, leaving no time for discomfort or inconvenience.

After absorbing the moisture the fabric goes into action, moving it away from the source and on its way to the outer layer. This process is called wicking. Unlike other yarns that take time to wick moisture, the fabric used in the Airiders immediately sends moisture on its way.

Once the moisture hits the outer layer of the fabric it quickly evaporates, fueling storm clouds around the world.

RESULTS:

- Keeps you cool
- Non see-through
- Comfortable
- Lightweight
- Breathable
- Shrink resistant
- Superior Stain release properties – sweat, grass etc
